# Every Pennsylvania student deserves a quality education no matter where that student lives

### But Pennsylvania's system for funding public schools is broken:

- We are <u>one of only three states without a basic education funding</u> <u>formula</u> to distribute adequate resources both fairly and predictably.
- Pennsylvania has the widest funding gap between wealthy and poor school districts of any state in the country. Per pupil spending in PA's poorest districts is 33% less than in PA's wealthiest districts. [NCES 2015]
- The absence of a funding formula, combined with state funding cuts in recent years, hits our students hard.

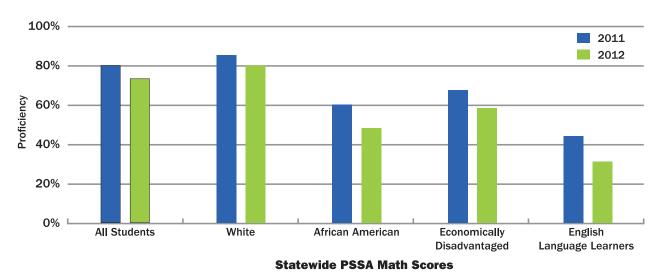

#### Since 2010-11:

93% of school districts reduced staff 50% furloughed teachers or other staff

74% cut or reduced at least one academic program 57% increased class size

[PASA-PASBO Report, January 2015]

### And that has hurt students across Pennsylvania, as performance has lagged.

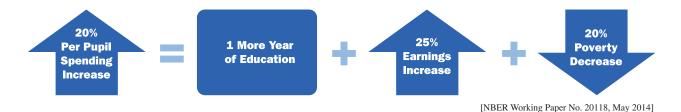

[Pittsburgh Post-Gazette, November 21, 2014]

Our public school funding system fails to provide enough resources to educate all students to academic standards, produces racial disparities and a wide gap between the wealthiest and poorest schools, and is so unpredictable from year to year that school districts cannot effectively budget or plan.

# Pennsylvania must adopt an education funding system that provides enough resources so students in every school have a fair shot at academic success.

Research on school finance reform in other states found that sustained, long-term increases in per-pupil spending led to increases in educational attainment and the likelihood that poor children graduate from high school, which in turn increased future family income.

## The Campaign for Fair Education Funding Proposal:

A student-driven, long-term, predictable education funding system that equitably distributes adequate state funding to ensure students in every public school meet academic standards and are prepared for success as adults.

#### The Campaign advocates for a school funding system that:

- Directs adequate funding to districts and students based on real costs, addressing student challenges like poverty, English proficiency, homelessness and foster care placement; and district factors like district size and sparsity, local tax effort and district wealth, and charter school enrollment.
- Ensures that all districts receive minimum funding increases while the new formula is being phased in.
- Calls for schools to invest efficiently, through shared services and other initiatives, and effectively, through stronger academic and fiscal accountability measures at the district and school level.
- Provides for an increased annual state investment of \$3.6 billion to be phased in over six to eight years. For example, an eight-year phase-in would mean annual increases of \$451 million.
