Help Promote the May 19 Ballot Question to Support Universal Pre-K

Why should all 3- and 4-year olds have access to high-quality Pre-K?

- They are more likely to advance grades and have improved social skills.
- They will have better early literacy, language, math and social/emotional skills as they enter kindergarten.
- They will be less likely to need special education
- They are less likely to repeat a grade
- They will be less likely to be involved in crime later in life
- They are more likely to graduate high school and attend college

Pre-K lays the foundation for a more successful Philadelphia

Philadelphia children need more than babysitting. Too many children now enter kindergarten without the basic skills they need to prepare them for success in school. Only high quality early childhood programs have these benefits.

Ballot measure #4 states:

‘Shall the Philadelphia Home Rule Charter be amended to provide for the creation, appointment, powers and duties of an independent Commission on Universal Pre-Kindergarten which would recommend an implementation and funding plan for achieving universal high quality pre-kindergarten for three- and four-year-olds in Philadelphia without taking away funds used for existing education?’

What will Ballot Measure #4 do?

1. Create an independent Commission comprised of parents, childcare providers, business and education leaders, education advocates, regional or national experts, and representatives of government and the School District of Philadelphia.
2. Determine how to fund and implement universal Pre-K for 3- and 4-year-olds, and present recommendations to the next Mayor and City Council by January 15, 2016.
