

Most Undocumented and Uninsured Children Live in 17 Counties Across PA

Note: County numbers are derived by identifying the share of foreign-born, non-citizen children living in each county (from the US Census 2016 ACS 5 Year Estimates) and assigning the same share of undocumented, uninsured children to that county. The source for the estimated number of undocumented PA children and the share of children who are uninsured is the Migration Policy Institute in consultation with Penn State and Temple University faculty.
